

Follow these 3 steps to add the **Wear Me** button to your WordPress store. No coding knowledge needed — just follow along.

1 Install a free plugin

Log in to your WordPress dashboard (go to yoursite.com/wp-admin).

On the left side click **Plugins**, then click **Add New**.

In the search box type exactly: **Insert Headers and Footers**.

Find the plugin by **WPCode** and click **Install Now**. Then click **Activate**.

Left side menu:	
Dashboard	
Plugins	■ click Plugins
Add New	■ then click Add New
Search box: Insert Headers and Footers	■ type this in the search box
WPCode — Insert Headers and Footers	■ Install Now → then Activate

■ The plugin is completely free. It just gives you a box to paste code into — nothing complicated.

2 Open the plugin settings

After activating, look on the left side menu for **Settings**.

Click **Settings** and then look for **Insert Headers and Footers** — click it.

You will see two boxes — one for the top of the page (Header) and one for the bottom (Footer).

Settings	■ click Settings
Insert Headers and Footers	■ click this
Scripts in Header [text box]	■ do NOT use this one
Scripts in Footer [text box]	■ paste your code in HERE

3 Paste your code in the Footer box and save

Paste your Wear Me code into the **Scripts in Footer** box — the bottom one, not the top.

Then click **Save** at the bottom of the page.

BEFORE (the Footer box is empty)

Scripts in Footer:	
[empty box]	■ click inside this box
AFTER (your code is in the Footer box)	
Scripts in Footer:	
<script async src="https://fit-room.com/widget.js"	■ paste your code here
data-fit-room-key="YOUR_KEY"></script>	
[Save]	■ click Save

■ After saving, open any product page on your store in a new tab. The Wear Me button should appear on your product images within a few seconds.

Stuck at any point? Just reply to this email — we will sort it for you personally.
